火魅子伝～恋解～ 臥雲の章 完

HIMIKO-DEN "RENGE" GAUN NO SHOU THE END

AFTERWORD

Just three years ago, there was an offer from Makino who is the original author and also the company director of Red Company to design game characters. After many brainstorming sessions by the two of us, one by one, the characters came to realization and the final number of characters I've done till the colored illustrations was about 80. Unfortunately, not even ten percent of these shows up in the manga.

The creation of this manga is not intended as the manga version of the game, the concept is "within the theme of Shiroka-dou, each creator is expressing almost freely, playing as he like using many types of media (game, anime, novel, music, manga, etc.)". Because of that, compared to the anime and the game, there are some, ...no, "considerable" in more appropriate here, differences. In that spirit, I was also given the privilege to create this manga as I like and following my own way quite extremely.

Anyway, concluding it to one volume like this, I think it's wonderful that the three years' worth of effort can finally take form. I'd like to say my thanks from the bottom of my heart to, first, Makino, people who lent me a hand in creating this manga and all the readers.
